

Ekosistem je dinamičen kompleks skupnosti rastlin, živali in mikroorganizmov (biota – glej [biomasa](#)), ki v interakciji z neživim okoljem (abiota – [abiotski procesi](#), [abiotske storitve](#)) ustvarjajo funkcionalno enoto” (Maes et al. 2014; Reid 2005)^{1) 2)}. Tudi človek je, kjer je prisoten, del ekosistemov (Harrington et al. 2010).

Glej tudi [Ekosistem](#).
