

# Funkcije ekosistemov

Funkcija ekosistema izraža podmnožico interakcij med biofizikalnimi strukturami, biotsko raznovrstnostjo in ekosistemskimi procesi, ki podpirajo zmožnost ekosistemov za zagotavljanje ekosistemskih storitev, pri čemer le-ta ohranja svojo integriteto (Maes et al. 2014)<sup>1)</sup>. Primeri takih nalog so primarna proizvodnja in biogeokemijski krog (Harrington et al. 2010)<sup>2)</sup>.

## AlpES project
