

Smart Altitude Toolkit online interface

The new Smart Altitude Online Toolkit is available at: <https://smartaltitude.eu>. This new web portal is designed to provide a low carbon decision support system to two categories of ski resort stakeholders:

- ski resort operators: definition of the low-carbon decision-making criteria and related tools, with the suggested steps for decarbonising a ski resort, including results monitoring and results communication;
- ski resort policy makers: policy recommendations and roadmaps on how to promote a low carbon ski resort and how to make good practices visible, the recommendations and roadmaps developed in WP T4 will be reported here.

The new Smart Altitude Online Toolkit has been widely promoted through the News section on the Smart Altitude website

(<https://www.alpine-space.eu/projects/smart-altitude/en/news-events/news/news-overview>), the Smart Altitude Newsletter of the first half of 2020, the project brochure, the project flyer for replicators and the Smart Altitude Webinar Series. In the Home Page (see the figure below) the following elements have been inserted:

- “About Smart Altitude Project” link to the official website of the Smart Altitude project: <https://www.alpine-space.eu/projects/smart-altitude/en/home>
- “Login” button to register and access the personal area of the website
- Menu Bar with the link to the main sections of the website: ABOUT, TOOLS, REPLICATORS, CONTACT
- Link to the video of the Smart Altitude project
