

Innovation networks

“Innovation networks are all forms of organisations that serve the exchange of information, knowledge and resources and by suitable learning among at least three partners help to bring about innovation are based on confidence and stable cooperation relations. In innovation networks ...

- innovation activities are coordinated
- legally independent enterprises pool their business relations as far as their innovations potentials are concerned
- stable relations are formed between enterprises and other players (training and research institutions, political players, etc, in order to gain competition advantages jointly and in a cooperative way
- the joint efforts yield innovative products, processes and services.”
