

RURBANCE

Rural-Urban inclusive governance strategies and tools for the sustainable development of deeply transforming Alpine territories.

- AS priority area: Competitiveness and Attractiveness of the Alpine Space
- Duration: 01/07/2012 - 30/06/2015
- [Project webpage](#)

Project Partners

- **Lead partner:** [Lombardy Region, Environment Energy and Grids Directorate](#) (IT)
- [City of Graz](#) (AT)
- [Regionalmanagement Graz & Graz Surrounding](#) (AT)
- [Regional Council of Rhône Alpes, Mountain, Tourism and Natural Regional Park Direction](#) (FR)
- [Grenoble Alpes Métropole, Department of Prospective & Territorial Strategy](#) (FR)
- [University Pierre Mendès, Town Planning Institute of Grenoble](#) (FR)
- [Urban Agency of the Grenoble Region](#) (FR)
- [Leibniz Universität Hannover, Chair for Regional Building and Urban Planning](#) (DE)
- [Allgäu GmbH - Economic Development and Tourism Management Agency](#) (DE)
- [Veneto Region, Urban and Landscape Planning Department](#) (IT)
- [Piedmont Region, Department for Strategic Programming, Spatial Policies and Housing, Unit for Spatial and Landscape Planning](#) (IT)
- [Anton Melik Geographical Institute, Scientific Research Centre of the Slovenian Academy of Sciences and Arts](#) (SI)
- [Regional Development Agency of Ljubljana Urban Region](#) (SI)
- [City of Zurich, Urban Development and Foreign Affairs](#) (CH)

Project summary

Sectorial policies are inefficient to offset the relation among urban and rural areas and their development model due to the complexity to merge in an organic whole a lot of solutions which have been carried out to tackle the critical situation in terms of loss of competitiveness, landscape degradation, lack of water and soil quality, loss of biodiversity, territorial fragmentation and abandonment, intense use of the resources, quality of life decay. A balanced development can not be achieved with sectorial interventions but only by crossing the segmentation of the territorial policies. Therefore, Rurbance is developing cooperative and integrated governance models towards the implementation of Joint Development Strategies that induce territorial requalification processes in order to hand back value to the economic, social, environmental and cultural heritage that constitutes the identity of the territories from the top to the bottom. As a result, rural/mountain and urban communities become “equal players” in an inclusive decision making process. Source: [RURBANCE project summary](#)

Hypotheses

Unlike project outputs, outcomes and results cannot be described in a standardised way. Therefore, they are listed as free text:

<to be filled in> (urban partnership requires vital networks and processes)
 • Cross-sectoral and integrated approaches are needed to slow down impacts in rural areas)
 territorial development, urban-rural partnership, peri-urban development, rural development]

Keywords

• peri-urban development

Last update: 2014/12/17 11:35

Topics

- Territorial cohesion through balanced social and economic development
- peri-alpine relationship

Results

Results of a project can be differentiated in outputs, outcomes and impacts of an intervention.

Outputs

Output	Category	Language(s)	Target group	Remark
Policies Analysis	report	EN	government/national authorities, regional authorities, municipalities, research institutes, public service agencies, independent experts	

The Work Package 4 Final Report collects the results of the activities carried out during the first year of the RURBANCE Project, to give account of the work done but also to identify the first contributions to the Joint Development Strategy whose definition is the project final objective. To this end the WP4 activities established a trans-national project framework concerning rural-urban relationships based on a policy analysis. The activities included the identification by all Partners of a “rural-urban” working area (Territorial System), then the collection and analysis of a set of policies, with an approach that focuses on governance models and their evaluation in terms of balanced territorial development.
