

## Synergies - Sustainable settlement development

([MORECO](#), [ACCESS](#))

Both projects develop measures for a more sustainable settlement development, especially in terms of land-use, daily mobility and service provision for the population:

- strategies to improve accessibility to services of general interest ([ACCESS](#));
- pilot actions on how to improve services in mountain areas based on ICT ([ACCESS](#));
- local tools for households to calculate housing and mobility costs of a potential housing location ([MORECO](#));
- tools for regional analysis, settlement assessment and mobility planning for planners and practitioners ([MORECO](#)) to support integrated settlement development;
- slide pool for policy makers that raise awareness of mobility costs and promote more sustainable settlement forms.
