Resource Title	Old Age Dependency Ratio
Resource Abstract	The old age dependency ratio is the ratio of people over 64 to those aged between 15 and 64. It shows the number of people aged 64+ for every hundred people aged 15 to 64. It expresses the socio-political “burden” on the economically active population by the elderly. A high ratio means only few people aged 64+ for every hundred 15 – 64 year olds and a low ratio stands for many older people and relatively few younger ones.
