

<b>Section</b>	<b>Description</b>
<b>Resource Title</b>	Foreign Residents
<b>Resource Abstract</b>	This indicator shows the proportion of foreign residents in the total municipal population. The term “foreign resident” denotes certain people with foreign citizenship. The foreign residents in the Alpine countries are a very heterogeneous mix dominated by people originating from Southern Europe. In socio-demographic terms, “foreign resident” is associated mainly with low educational standards, low income and consequently low social status, particularly if applied to foreign workers of the first generations. In addition and increasingly, foreign residents are found in highly qualified jobs, as entrepreneurs, investors and as “amenity migrants”.
