

<b>Section</b>	<b>Description</b>
<b>Resource Title</b>	Livestock Size Units per Farm
<b>Resource Abstract</b>	The Livestock Size Unit (LSU) is a reference unit which facilitates the aggregation of livestock from various species and age as per convention on the basis of the nutritional or feed requirement of each type of animal. 1 LSU is the grazing equivalent of one adult dairy cow. This indicator can therefore be read as a measure of the grazing pressure that the municipality is subjected to, but also as the average number of farm animals – equivalent to a dairy cow - per farm.
